

## **ANNOUNCEMENT OF DISTANCE EDUCATION FOR UNDERGRADUATE COURSES**

**Dear Students,**

As you already know, distance education will be initiated as of March 30, 2020 in our university.

At this stage, theoretical courses offered in our Undergraduate Program in the Spring Semester of 2019-2020 will be taught via distance education. You will also carry out your EMÜ 403/404 System Analysis and Design courses at home keeping in touch with your project supervisors.

Information about how to conduct exams will be shared with you later. Assignments, reports and other works to be given during distance education can be evaluated by the instructors as usual.

For all the courses they are enrolled in, all students will automatically be registered to the Moodle environment (<http://evdekal.hacettepe.edu.tr>) under the coordination of HUZEM, Hacettepe University's Distance Education Center. In order to login to the system, student id number will be used as username. For national students, password is TC ID number's first 6 digits, and it is id numbers themselves for international students. Once you login to the site you have to change your passwords. This Moodle system is the main system of the university for distance education.

Some courses under the supervision of our department may continue to be conducted with our department's Moodle system that we have already been using. The announcements about the conduct of courses will be made by the corresponding instructors in the University's Moodle system. For this reason, firstly you should visit <http://evdekal.hacettepe.edu.tr> and follow the announcements of the instructors. The instructors can carry out their courses in different suitable ways, you should regularly check the University's Moodle and our department's Moodle for updates and announcements. You can ask your questions about distance education to the related instructors via email.

In our distance education process, some lecturers may also utilize real-time classroom meeting tools such as Zoom or Big Blue Button. Carefully follow the course's own announcements on this matter.

Our department's courses that will be carried out with distance education are as follows:

- EMÜ102 - Computer Aided Technical Drawing
- EMÜ112 - Computer Programming
- EMÜ222 - Deterministic Operations Research
- EMÜ232 - Probability and Statistics for Engineers II
- EMÜ242 - Work Analysis and Design
- EMÜ312 - Database Management Systems
- EMÜ322 - Simulation Modeling and Analysis
- EMÜ342 - Production Planning and Control II
- EMÜ464 - Project Management
- EMÜ403 - System Analysis and Design I
- EMÜ404 - System Analysis and Design II
- EMÜ332 - Quality Management
- EMÜ334 - Introduction to Regression Analysis
- EMÜ411 - Management Information Systems
- EMÜ413 - Decision Support Systems
- EMÜ437 - Probabilistic Risk Assessment and Decision Support

EMÜ446 - Supply Chain Management  
EMÜ447 - Distribution Logistics  
EMÜ473 - Technology Entrepreneurship

For the courses offered to our department by other departments, follow the announcements of those departments.

Regularly visit our department's website, university's main website, the websites of other relevant departments, HUZEM, the Registrar's Office and the Computer Center, and always be informed about new announcements.

We wish you health and success.
